SUBJECT:

DOOR MOUNTED RADIO SPEAKERS

MODELS:

MGB

A new one piece speaker assembly has been introduced which incorporates a water deflector in the form of a white plastic cover over the top half of the diaphragm.

As the speaker is common to both doors, it is important that it is always fitted with the water deflector to the top.

This change took place at VIN #GHN5UH417229G. The later assembly is interchangeable with the earlier type.
